Value Driver Tree Rubric

Criteria	Meets Expectations
Completion	Value Driver Tree has been fleshed out to have at least one main node (Key Value Driver) and two levels of 'sub-value drivers'
Process & Understanding	- Value Driver Tree demonstrates that the student understands how to structure a basic Value Driver Tree which shows clear mathematical relationships between connected drivers - Value Driver Tree demonstrates that the student is able to break down profitability into the subsequent drivers which make up profitability (i.e. Revenue – Operating Costs and then expand on Operating Costs further into fixed and variable costs)
Presentation	- Value Driver Tree follows the structure outlined in the template provided - Value Driver Tree is clear and the connection between the sublevels and main value driver makes logical sense
